| Summary

Aspiring Java Full Stack Developer with a strong foundation in frontend development using HTML, CSS, and JavaScript, along with Java, Object-Oriented Programming (OOP), SQL, and MySQL. Currently pursuing Java Full Stack Development and learning React.js and Spring Boot. Passionate about building practical projects, solving problems, and continuously improving my development skills.

| Skills

Frontend: HTML5, CSS3, JavaScript (Learning), React.js (Learning)

Backend (Learning): Java, JDBC, Spring Boot, REST APIs

Database: MySQL, PostgreSQL

Tools: Git, GitHub, VS Code

| Projects

Myntra Clone Store – HTML | CSS | Font Awesome |  GitHub Jan 2026

A beginner-friendly, fully responsive e-commerce clone website reimagining the Myntra shopping experience as a combined clothing and bookstore platform. Built a clean homepage with a responsive navigation bar, hero banner, search bar UI, and promotional offer section using semantic HTML5 and CSS3. Implemented product card layouts for programming book listings and men's, women's, and kids' clothing categories, along with a footer containing social media icons and useful links, focusing on a mobile-friendly, modern user interface across devices.

SkyCast – Weather Forecast App

HTML | CSS | JavaScript | OpenWeather API |  GitHub |  Live Demo Jun – Jul 2026

A responsive weather forecast web app fetching real-time data via the OpenWeather API using city search or geolocation. Displays current temperature, humidity, wind speed, and sunrise/sunset timings, with a dynamic UI that adapts to live weather conditions. Built with vanilla JavaScript (ES6, Fetch API) and deployed on GitHub Pages and Vercel.

Smart Hospital Management System

Java Full Stack Development |  GitHub | In Development

Developing a smart hospital management system as part of a 2-member team, working with Java, Spring Boot, React.js, and MySQL to build the application. Developing and integrating features to simplify hospital management and improve the overall user experience.

| Education

Bachelor of Computer Applications (BCA) 2024 – Current

At Samarth College of Computer Science, Belhe

Affiliated to Savitribai Phule Pune University (SPPU)

| Training & Development

Java Full Stack Development | Cyber Success

Currently pursuing a 6+ month industry-oriented program, selected through the Enrollment Drive at Samarth College of Computer Science.

Eager to learn, adapt, and grow as a developer – looking forward to opportunities where I can apply my skills, take on new challenges, and contribute meaningfully to real-world projects.
